1	Download Canon Setup file from <a href="https://www.canon.com/ijsetup">Canon.com/ijsetup</a>	3
2	Install Canon Printer   <a href="https://www.canon.com/ijsetup">Canon.com/ijsetup</a>	5

Canon printers give high-quality printing documents with high speed and have become an integral requirement of our personal as well as professional life. Get your Canon Printer connected with your device and download the setup from [canon.com/ijsetup](https://canon.com/ijsetup) and learn how to install it. The canon ij printer setup is very cost effective and because of its functionality all your money has been spent on the purchase of this device.

## DOWNLOAD CANON SETUP FILE FROM CANON.COM/IJSETUP

1. Open any browser on your computer and open [canon.com/ijsetup](https://canon.com/ijsetup) site.
2. Enter the name of your Canon Machine in the search box.
3. Select the Driver, Software & Firmware from the Documents drop-down list.
4. Click on the '+' symbol accessible near to the Downloads menu.
5. Select the correct Operating system and Version of your computer.
6. Click on the IJ Network Tool from the search list.
7. Click on the Download button to start the downloading process.

## INSTALL CANON PRINTER | [CANON.COM/IJSETUP](https://canon.com/ijsetup)

1. Open and start the printer and find the WPS button on the Wi-Fi router.
2. From the [canon.com/ijsetup](https://canon.com/ijsetup) on your MAC, download printer drivers for Mac.
3. Open the file and run it and then press the WPS button on the WI-FI router and then, press the OK button on the canon printer.
4. It will automatically connect using the network.
5. On Mac, click on ADD PRINTER and then, locate the printer.
6. Start the installation and complete it.
